usAIRco

Coils

STEAM, WATER, REFRIGERATION

Available

**For prompt delivery on
priority orders!**

usAIRco coils are engineered and fabricated to meet the job requirements and the operating budget. They are sturdy, efficient, finely finished and tested to deliver rated capacities. Steam coils for heating, water coils for heating or cooling, and special coils for refrigeration are available. Our increased manufacturing facility assures delivery of USAIRCO Coils on time.

Used in conjunction with USAIRCO air handling equipment, Blast Coils and Cooling Coils help maintain proper regulation of temperature. With a background of 20 years in serving Indus-

try, USAIRCO air conditioning units are doing a job today for every phase of the War Effort. Individual units and assemblies of Blowers—Washers—Coils—Filters are on duty in Army Camps, hospitals, ships, air bases, war plants, shipyards and industrial plants.

*Write today for complete
details, prices and delivery
dates.*

UNITED STATES AIR CONDITIONING CORPORATION

Manufacturers of the most complete line of air-handling equipment. Factory representatives in principal cities.

NORTHWESTERN TERMINAL • MINNEAPOLIS, MINNESOTA

AIR WASHERS

Single and double stage air washers in various capacities for all needs. Used in installations where dependable equipment is required for air cleaning, cooling, humidifying or dehumidifying. Air Washers operate with cold water or refrigerating apparatus.

"E" BLOWERS

Belt-driven exhaust blower for light duty work where static resistance is low. Type "E" Blowers are easy to service; are available in several discharge arrangements. An adjustable pulley permits 30% speed variation to handle air as required in different installations.

HEAVY BLOWERS

Backwardly curved blade type shown (also blowers with forwardly curved blades), available in types and capacities ranging from 2,000 to 70,000 c.f.m. Used for large scale air handling jobs. Made in single and double inlet, and in varied discharge arrangements.

"SU" BLOWERS

Direct-driven exhaust blowers are designed for use where space is limited. Built strongly, mounted rigidly to prevent vibration. Slow speed motor operates the wheel. Efficient for exhaust applications in warehouses, factories, barracks or mess halls.

UNIT HEATERS

Suspension type small area heater for use with steam. Deflecto Grilles distribute heat where needed. This type of heater is ordinarily used to supplement central systems in large Defense plants, Army camp barracks and community buildings.
